### **Research Experience**

---

Database Management and Creation – I have worked with large criminal history databases and social science databases. I helped create a comprehensive criminal history database that tracks the criminal case processing for all arrests in the state of Texas across a 15 year period. I also helped create and manage a national survey database, qualitative coding databases, and a sports statistics database.

Surveys – I have designed, conducted, and analyzed multiple surveys, both independently and in collaboration with a team of researchers.

Qualitative Interviews – I have conducted, coded, and analyzed interviews, both independently and in collaboration with a team of researchers. These interviews involved criminal justice actors, as well as at-risk populations of probationers and prisoners.
